# THE FINANCIAL BUSINESS

**Finance is a data and information intensive business...**

simplified method

advanced method

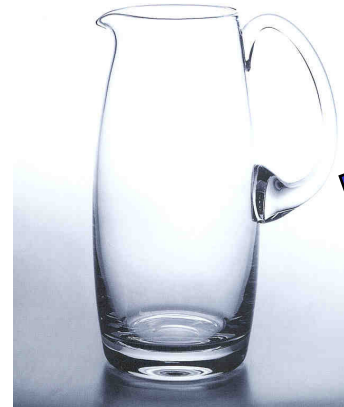

*Financial operators need a whole risk management and evaluation infrastructure (a decision support system) at their fingertips!*

# Increasing demand of computational “capacity”

*The Metaphor of the Water Container (by Monte Paschi di Siena)  
... and of the Water Tap (by BE04)*

**Increase/purchase  
new internal “capacity”**

**Use external “capacity”  
“GRID outsourcing”**

# How are we going to do this...?
