

OGF-Europe: Shaping International Collaborations

OGF24

Singapore, September 16th 2008

David Wallom

Oxford e-Research Centre, University of Oxford

david.wallom@oerc.ac.uk

www.ogfeurope.eu

Making an impact

Delivering a strong message around the **value of standardisation bringing innovation**

Developing standards with end-users, developers diverse groups through International Outreach

Connecting **user groups** to share best practices & transform them into standards

Supporting the **implementation of European standards**

Fostering synergies between other SDOs such as W3C, SNIA, DMTF, OASIS

Ensuring OGF standards are aligned with the needs of industry

OGF-Europe @ OGF24

- Identifying adoption trends & requirements for Distributed computing

1st Survey OGF23 & OGF24 <http://tinyurl.com/4ljm2w>

- Supporting International Partnerships

EU and Asia Pacific Grid Collaboration and Future Challenges

Workshop in collaboration with EGI_DS

Now!

- Developing Standards

- GIN Workshops **Breakthrough Room**

OGF24: Status of World-wide Interoperability Activities: **Wed 14:15-15:45**

OGF24: Security Challenges in World-wide Interop Activities **Wed 16:00-17:30**

Driving Forward Standardisation

- **Bridging the gap between OGF standards and the needs of, Industry**
- **Industry Expert Group (IEG): 17 distinguished, industry members**
- Analysing the needs of EU businesses & ensuring OGF standards are aligned with industrial needs
- Active in creation of introducing OGF-Europe Workshops on transition to cloud computing and data services
- **Reports on adoption challenges, best practices & user case studies**
- **Introducing & educating the Next Generation of Scholars**
- Funding & supporting Student Scholars at OGF23 & OGF25

OGF-Europe: Setting the Standard

- **1 International event**
 - OGF23, in collaboration with BEinGRID over 550 participants, rapporteur reports
- **Digital Repository Community Outreach Seminar @ OGF23** bringing together experts & users
 - Bringing together over 70 developers and user groups from diverse sectors
 - Highlighting horizontal issues through use cases and best practices
- **3 Tutorials @ OGF23** enhancing skills of developers & users
 - Managing computational activities in a Grid system
 - SRM specifications with application scenarios
- **GIN Workshops** pushing standards forward
 - BES/JSDL/GLUE Workshop, Sept 2008, CERN
 - 2 GIN workshops @ OGF23

Looking Forward

- **OGF25** Services, Software development, Telecommunications, Transportation, Modelling, Education, Sports Technology, Automotive industry, **2009**
 - in collaboration with the EGEE User Forum, **Catania, Italy, March 2-6**
- **Tutorials @ OGF25**, Energy and Utilities, Green IT,
- **GIN Workshops @ OGF25** Health Care, Earth Sciences
- **Adoption Challenges Reports** Scientific Research,
- **5 Community Outreach Seminars**, Social Sciences,
- **Digital Repositories: Evolving with a community**
 - Proposed workshops @ IDCC, Edinburgh, UK, December 1-2, 2008 & OGF25
 - Establishment of OGF DR Working Group
 - Community Best Practice Report

COS: Mobilising Sectors

1. **Green IT and the EC Code of Conduct for Data Centres**
(Tentative Date October 2008 webinar)
2. **Service Oriented Infrastructure for telecoms** **Tentative Date**
Madrid, ES 10-12 Dec 2008
3. **Creative Industries** **(Tentative Date Spring 2009)**
4. **Software Development for Distributed Computing** **Tentative**
Date OGF25 2-6 March 2009
5. **Computing for Sustainable Intelligent Transport Systems**
(Tentative date Autumn 2009)

Synergising with the Community

ON-DEMAND
ENTERPRISE

British Publishers
media with influence

HPC
wite

- Over 120 press clippings & cuttings (Jan-June '08)
- 1st Announcement: 80 articles published globally

GridTalk

- Input to Grid Impact Reporting
- Promoting resources for adopters: GridCafé
- Dynamic, interactive global communications – GridCasts & GridMap

e-IRGSP2

- Adding to Grid Adoption Challenges Reports
- Attendance at Community Outreach Seminars & input to Community Best Practice Reports

Work With Us

- **Contribute to our monthly eAnnouncements distributed to Community of Distributed Computing**
- **Support our Community Outreach Seminars with your Best Practice examples**
- **Inform us of Standards you are working and how this facilitates your work**
